Dear Sir

Re: Report on the Computer Lab Project

This is a short_report on the Computer lab project at Leopold Takawira.

I am happy to inform you that our School Development Committee (S.D.C) has made quotations to various companies and individuals who can set up a proper lab for us. The cheapest they have found is requiring a total of US\$1 500 to install suitable desks which can accommodate up to 42 computers. The price includes fix and supply of all materials to be used. If that is done what will be left will be suitable chairs for the lab. The S.D.C have said that they have now raised this required amount to see kick start the installations by next week .

As for internet connections, Tel-One , a Government telecommunications company has promised us that by June they would come and set up Internet Services at our school as soon as Fibre optic cables reach Mvuma. The cables will be installed from Gweru-Lalapanzi-Mvuma. Their quote was a fee of \$700-\$1000 per month unlimited access, also included wi-Fi connectivity. Meanwhile the school is using two Econet Modems which when one once to use, you buy data for that time.

Lessons are being conducted well and students are very happy that they are gaining knowledge on how to use computers in everyday life.

Greetings from all at Takawira (i.e teachers and students).

Regards

Mahore A
(Computer Science)
